## **Chesson Labs Launches NUVAVET(TM), Receives Initial Orders**

**DURHAM, NC, USA. September 3, 2009** ----- Chesson Labs has launched its first product into the animal healthcare marketplace. The product, named NUVAVET(TM), is branded as an animal healthcare liquid bandage. NUVAVET was launched at CVC Central in Kansas City, Missouri this past weekend. CVC Central is one of the largest trade shows in the United States for professionals in the field of animal healthcare. This news comes just one month after Chesson Labs received 510(k) market clearance from the FDA for their liquid bandage product.

"We received an overwhelming positive response from the veterinarians in attendance." said Houston Barnes, Vice President of Corporate Development. "The sales and the relationships that were recognized at the show provide promise for the future."

One of the biggest differentiators of NUVAVET is its antimicrobial properties. NUVAVET is a breathable liquid bandage for use on small and large animals, including dogs, cats, horses, and birds. For use on intact skin, paws, or hooves, or to treat minor cuts, bites, scrapes, hotspots, burns or other irritations of the skin, to help keep them clean, dry, and help protect them from infection. The product is only available for purchase through veterinary clinics.

The product launch coincided with the launch [www.NUVAVET.com](http://www.NUVAVET.com).

### **ABOUT CHESSON LABS**
